

This is the place to find out what is going on at the ranch. Everyone is requested to help keep each other up to date on whats happening at the ranch.

Just use the "Comments" section to send in your information and it will get put on the "Ranch Blog".

05/26/08 Ron and Carla Kost, EMD 9. My rain gage showed .49" of rain since March ( Easter Weekend) it really looks brown on the ranch. Good news is the water tank on the central well on eight Mile is full and the Northern well on eight Mile is still putting water in the tank there. I guess that Randy Wright is doing a great job of keeping up with leaks and troughs that are over flowing. We had a board of directors meeting and the main things we discussed are repairs to the worst road problems ( most are on Eight Mile ) and the possibility of adding 1 black tank to the central well on Eight Mile ( like the one on Whitetail) for folks to get good water from. It would be on a 6' high platform for ease of getting water. We will be requesting volunteers to help with clearing out a place for the tank and for help building the platform. A second tank would be added to the North well when money becomes available.

1/21/08 I have a small fence line to clear maybe 300 ft. Is there any one at EWT that would like to make some money and has a tractor? You can call me to arrange at 832-256-5092 cell or home 281-376-3000 or reply to this e-mail.

9/12/07

Alan Murphy, EMD 11. My family and I were at the ranch over labor day weekend. Over that weekend i got some nice pictures on my game camera of a nice mule deer. I will e-mail the pictures to site but i have not seen to many whitetails yet. On the way out i shot a four foot rattle snake so everyone watch out for that. There is some trash at the front gate. Maybe whoever is doing this please don't leave it there it makes it look trashy.

8/17/07

Donald Williams, EMD 1. I agree with Barry,,,,,we also plan on owning our ranch for years to come. We would much rather see some quality deer than to see small bucks hanging. If everyone on the ranch felt the same way we could achieve this with a little effort. Together we own plenty of land to manage and

the sky is the limit, I'm just not sure how many people feel this way but I'm not gonna start shooting just because my neighbor does that just adds to the problem and doesn't solve anything. We are looking forward to the meeting in Sept. hope to see everyone there.

8/11/07

Barry Whitlock EMD 23, I was at the ranch and the guzzler was full to the top ! I met Steve and Donald who own EMD1 and it was nice talking to some hunters who want to manage their property like some of the rest of us. We all want big deer and pass up shots, so we can have them, and plan on owning their ranch for a long time. Anyone else out there feel the same? Let's Blog

8/11/07

Ron and Carla Kost, EMD 9 were at the ranch for the weekend to help with the deer survey. Thomas and Connie Crick with their son Tommy Crick, EMD 34 and Steve Wykowski and Donald Williams, EMD 1, were also involved with the survey. The ranch is still green but it is also dusty. My rain gage showed 3.67 inches of rain between the first week of June and the first week of August and boy is it hot during the day. Everyone remember that we will have a land owners meeting at 1:00pm on the 1<sup>st</sup> of September at the well on Eightmile.

8/6/07

Laurie Baethge, We were at the ranch this weekend, It was wonderful, All the troughs were full, (as they have been for at least a year now, Yea!) The ponds and draws had water. It was green, lots of grass, and the Purple sage was in full bloom. It was beautiful. The hills and flats were so colorful. I took lots of pictures. We also saw several fawn.

7/22/07

Steve Wykowski, EMD1, we were at the ranch over the July 4th week everything looks healthy but noticed that no repairs have been started on well C. Just curious as what the plans are sure could use some water up there. Would appreciate some updates. THANKS

6/09/07

Ron and Carla Kost , EMD 9,were at the ranch the first part of June and everything is green, green green. The rain gage at our place , EM 9, showed 6.9 inches of rain from first part of April until first part of June, about 2 months. The rain has affected the ranch roads in some places so be careful if you are going in at night, there are a couple of big holes on Ranchero rd going thru Eightmile draw.
